Our Reflex-Zone Insole for Diabetics

In recent years we have often been asked if our products, which we are advertising and successfully selling in the market with "stimulation of reflex-zones" and "reflex-zone massage", would also be suitable for diabetics. We can confirm this fitness for use.

This knowledge is proved by decades of work, practice and research of the pioneers Dr. Ingham, Mrs. Hanne Marquardt and Dr. med. Walter Mauch.

Whenever wearing the reflex-zone insole, the blood circulation is always stimulated. This is the basis of all further indications, because the blood is not only an "information carrier" of our body's state, but also an oxygen supplier and "waste" disposer.

The specially arranged elevations of the diabetes insole shall stimulate the following organs which are affected by diabetes:

- The pancreas, producing two important hormones,
 - The spleen, the "cleaning pearl" of the organism,
 - The liver, the "power plant" and "steersman" of the metabolism,
 - The kidneys as "blood filter",
 - The intestine, splitting up and spreading the food as well as disposing waste products.
- It cares via the lymphatics for a cleaning of the "white blood", how the lymph drainage is also called.

Our reflex-zone insole for diabetics does not replace a therapy but it is an option to use it as support during therapy.

**We wish you all the best with our insoles
and a good health!**

DiABETES[®]
with REFLEX ZONES

**original
REFLEX-ZONE-BED**

*international patent and
trademark rights*

Diabetic Sole

The stimulation and soft massage by means of the reflex-zone-bed aims to the following organs:

- Calvaria, Pituitary Gland
- Shoulder Girdle, Upper Lymphatics, Thyroid Gland
- Solar Plexus, Stomach, Pancreas
- Kidney, Adrenal Gland, Spleen (only on the left)
- Pelvic Region, Abdomen

The reflex-zone massage is known from experienced medical science. It is about traditional knowledge, which, in fact, has not been scientifically examined in detail so far.

Important areas of zones:

1. Calvaria
2. Pituitary Gland
3. Shoulder Girdle
4. Upper Lymphatics
5. Thyroid Gland
6. Neck Area
7. Lung
8. Liver
9. Solar Plexus
10. Stomach
11. Pancreas
12. Kidney, Adrenal Gland, Gall
13. Spleen (only on the left)
14. Transverse Colon
15. Ascending Colon
16. Descending Colon
17. Small Intestine
18. Pelvic Region
19. Abdomen
20. Vertebral Column

This schematic diagram displays a variety of zones at the sole of foot. You can also find detailed drawings in technical literature. All classical presentations of the zones of the organs are based on the research and statements of E. Ingham.
